

First Flight Travel - Complete Project Setup Guide

Is project ko naye system par set up karne ke liye niche diye gaye steps ko tarteeb se follow karein.

1.npm install

(in both frontend and backend cmd terminal)

Backend ky liye

2. make .env file in backend

Or yeh paste kr dy lekin **password** khud wala lgana hai jo install krty huy lgaya tha postgresql m

(DATABASE_URL="postgresql://postgres:**123**@127.0.0.1:5432/**firstflighttravel**")

- **123**=it is my postgresql password put your postgresql password, yeh bohat zrori hai warna database connect or create nhi hogii
- **firstflighttravel**: optional hai aap koi bhi naam de skty ho lekin yad rhy wohi naam URL ky last m bhi ho, best practice yeh hai ky mera wala naam hi rakho firstflighttravel

3.npx prisma generate

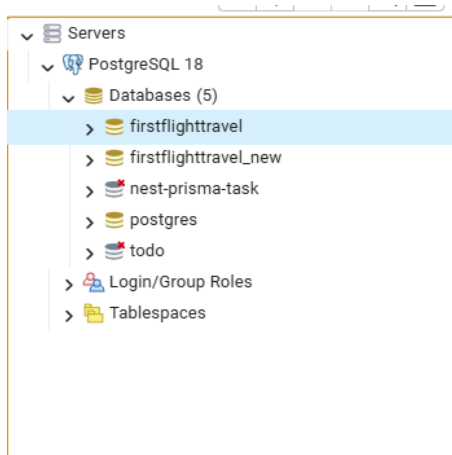

(backend terminal, is sy prisma client generate hoga jis sy database sy baat cheet hogi)

4.npx prisma migrate dev --name init

(backend terminal, is sy database ban jaye gi or connect ho jaye ga, dekhny ky liye pg4admin pr ja kr database dekh skty hai jis naam sy banaye thi)

(agr pg4admin pr database abhi tak nhi mili to aap ny password galat lgaya hoga check kr ky generate kr ky next step pr jana hai .env m sahi password lgayee phr yeh command chlye jab tak database na ban jaye)

Pg4admin pr ja khud sy mat banana warna phr pata nhi chly ga connect hoye hai ya nhi , command chlinea sy ban'ni chahye manual ja kr nhi banani

Jab yeh ban jaye gii phr next step pr jana hai

5. npm run start:dev

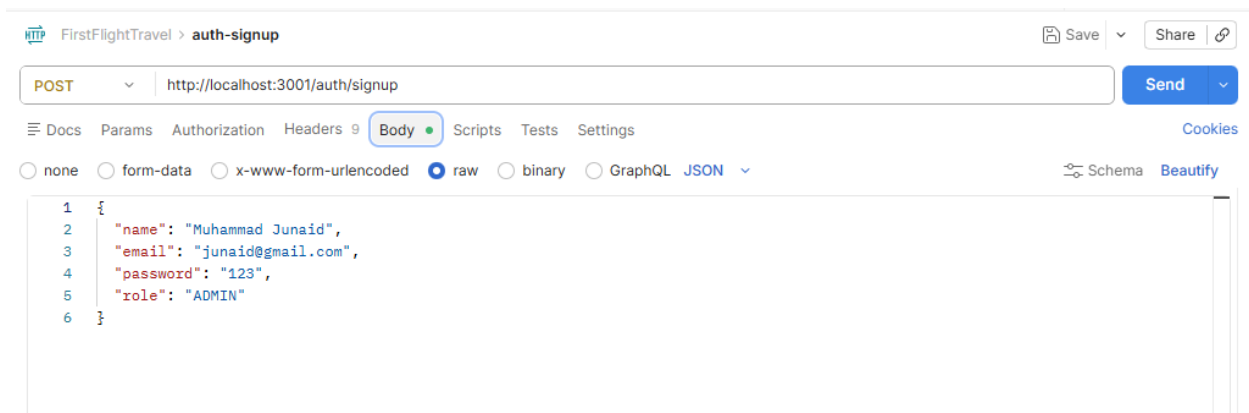

Mubarak ho apki backend chal gayee hai

FrontEnd ky liye

6. npm run dev (frontend terminal pr)

And boom apka project chl gya hai

Extra: apko admin panel pr jane ky liye postman ki zrorat hogii or as a user ap project ky sign up page pr jaa kr register ho skty hai

Is sy ap log in kr ky admin panel pr js skty hai

Or kuch poshna hua to ap mujh sy contact k rly

Alternative way ap koi user sy sign up kr ly database m ja kr uska role user sy admin pr kr dy
or usi sy log in kry apka admin panel open ho jayee ga
